

## WHAT IS MY VISION OF THE FUTURE OF

# EUROPE

## YOUNG PEOPLE

Now, we are just million of students, but one day some of us are going to be teachers, politicians, scientists, we are going to be the ones that control the world. Every single one of us is going to have impact on the society we will live in.

## WHAT ABOUT EUROPEAN'S MINDS

The mental health is something that is growing more and more every day, happily. We have to make the difference and change some people's minds . We need to start to give the Earth what it wants, and not only what we want!

## HOW TO PRESERVE PLANTS

There is a huge seed's bank in Norway, so if right now all the plants were gone, we could plant the biggest part of them again! But we don't need that much of space or money to built a seed bank.

## A SEED BANK

We can built a small seed bank with only the species that came from around us. Can you image if every single person around the world did that? It would be amazing! We could rebuilt the areas that died because of fires, for example. But we could study every single one of them.

## RURAL AREAS

There are many europeans that live in rurals areas, and we should listen to them and here is why: the biggest part of them grow with the traditions from generation to generation and what is that about? Plants. Isn't only about the pure air they breath.
