

## MY VISION OF EUROPE:

Even though I think there are a lot of things to fix and work on, I believe in a future where all the principal values are accomplished, like democracy, respect of the human rights, freedom and equality for all the European citizens.

My vision of Europe, and some of the ideas that I wanted to represent in the drawings, are a future where there are equal rights between women and men, with more sustainable development, using renewable energy and achieving a better quality of the environment and also promoting scientific and technological progress. A future Europe that respects its rich cultural and linguistic diversity, that cares for the protection of the rights of the child like the right to education, protection or health, and that it also promotes peace and combats social exclusion and discrimination.
