

PANTONE BLACK by Júlia Castañé and Nora Llinàs

The image is the colour black. Because that's how we see the future of Europe. We don't see much hope. We have to preserve planet's resources instead of making money, we have to stop prices go higher and stop the inflation. Every time it's more difficult to live a normal life and where are the values of the UE if we are taking part in wars and not peace?

We see the future black because countries of Europe are having problems and institutions and governments forget to have respect to each other and respect their citizens as well. They will leave us a continent with problems and little solutions: climatic warmer, poverty, wars, social discriminations, economic crisis, lack of democracy... we voted for another Europe, we want to contribute for another Europe but now we are suffering their decisions.

That's why at the moment we see a black future. THE WRONG FUTURE. We deserve to live a good life.
